

Professional summary

I'm an indie developer specialized in building projects from scratch to deployed apps on the App Store! Thanks to my two-year training at the Apple Developer Academy, I've been exposed to concepts such as writing secure code, unit testing, and managing the full life cycle of an app: from deployment to post-launch maintenance, including user retention and ongoing App Store Optimization through analytics monitoring and product page iteration. I'm a compeller storyteller who likes to give back to the community my learnings when I explore new ways of building ideas by writing articles.

Experience

Internship · "Artificial Intelligence and Affective Computing" course UNIVERSITÀ SUOR ORSOLA BENINCASA, NAPLES **12/2022 - 03/2024**

Provided guidance in the understanding of the foundation of Large Language Models AI systems, their architecture and training process. Broke down the fundamentals of generative AI for image creation, its limitations and creative possibilities. Led interactive workshops on effective prompt engineering.

Mentor · "Cognitive Artifact Design and Prototyping Tools" course UNIVERSITÀ SUOR ORSOLA BENINCASA, NAPLES **09/2023 - 02/2025**

Offered support and shared practical coding expertise. Provided constructive feedback on presentation performances to boost audience engagement. Advised how to craft narratives with strong storytelling and coached public speaking tailoring confident body language and stage presence.

Mentor · "Artificial Intelligence and Affective Computing" course UNIVERSITÀ SUOR ORSOLA BENINCASA, NAPLES **10/2023 - 02/2024**

Provided guidance in the understanding of the foundation of Large Language Models AI systems, their architecture and training process. Broke down the fundamentals of generative AI for image creation, its limitations and creative possibilities. Led interactive workshops on effective prompt engineering.

Apple Developer Academy · ARTE (Advanced Research Track Experience) **09/2025 - 06/2026**

Collaboration with the Cardiology Department of the Polyclinic of Naples. Developed and deployed an open-source pre-operative meeting XR workspace for visionOS. Worked in a 6-people team following Agile methodology (two-weeks sprints). Covered Scrum Master role (servant-leader approach) optimizing teamwork and dynamics.

Education

Apple Developer Academy **09/2024 - 06/2025**

Hands-on development on Apple's devices ecosystem. 9-months learning experience on Swift coding, designing apps that follow Apple's Human Interface Guidelines, Accessibility and Entrepreneurial fundamentals.

Master's Degree · Cognitive Neurosciences · 110/110 CUM LAUDE **11/2021 - 05/2024**

Studied the scientific neural foundations of sensation and perception, developing research skills through a full experimental thesis: "On the Functional Brain Networks involved in Physical Understanding".

Apple Foundation Program **09/2023 - 09/2023**

One-month intensive course providing a first foundation in iOS app development, covering both coding and design from concept to prototype.

Bachelor's Degree · Psychological Sciences and Techniques · 105/110 **09/2016 - 10/2021**

Humanistically oriented psychology program covering psychoanalysis, developmental psychology, and foundational statistical methods for data analysis. Graduated with a thesis on "Cognitive Biases during Statistical Thinking".

Conferences and talks performed

Talk · Plants and AI project presentation LIBERA UNIVERSITÀ DI LINGUE E COMUNICAZIONE IULM, MILAN **03/2023**

Presented a personal creative project to a cohort of university students: a prototype generating AI images whose visual output responds to a plant's bioelectric signals, ambient temperature, and light levels.

Conference · Advances and Controversies in Cardiovascular Diseases HOTEL HABITA, POMPEI **06/2026**

Invited as an AI expert in a medical roundtable alongside cardiac doctors, engineers and medical students, contributing to a debate on the potential role of AI in supporting clinical diagnosis.
